

JOHN CEDRICK LIBRADILLA

IT Support Specialist • Network Technician • Web Developer
Cebu, Philippines | johncedricklibradilla@gmail.com | +63 956 075 7817 | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Detail-oriented BS Information Technology student with hands-on experience in web development, IT support, networking, and freelance digital design. Currently developing PasaHERO, an AI-assisted multimodal web navigation platform for Cebu City commuters. Skilled in building responsive web applications using React and Node.js, troubleshooting hardware and software issues, configuring network infrastructure, and delivering client-focused technology solutions.

EXPERIENCE

Software Developer (Capstone Project) — University of Cebu | 2025 – Present

- Currently developing PasaHERO, an AI-assisted multimodal web navigation platform that helps Cebu City commuters identify optimal jeepney routes using fare analytics, route visualization, and rule-based recommendations.
- Designing and implementing a rule-based recommendation engine using fare analytics, walking distance, transfer analysis, and landmark accessibility.
- Developing responsive React interfaces and integrating interactive mapping using Mapbox GL JS and browser geolocation APIs.
- Developing the backend using Node.js, Express.js, and MySQL while preparing technical documentation and software architecture artifacts.
- Collaborating with team members throughout planning, development, testing, and evaluation.

Freelance Web Developer, IT Support & Graphic Designer — Self-Employed | 2023 – Present

- Developed responsive websites and web applications for businesses and organizations.
- Designed branding materials, promotional posters, tarpaulins, apparel graphics, and other print-ready marketing assets.
- Provided IT support including Windows installation, troubleshooting, and basic network configuration.
- Managed multiple client projects while maintaining professional communication and meeting deadlines.

SELECTED PROJECTS

PasaHERO — Featured Project

AI-assisted multimodal web navigation platform currently in development, designed to help Cebu City commuters identify optimal jeepney routes using fare analytics, route visualization, and intelligent route recommendations.

React • Node.js • Express.js • MySQL • Tailwind CSS • Mapbox GL JS

LTO Reviewer

Interactive web application for Philippine LTO examination preparation with responsive design, instant answer feedback, and gamified learning.

Next.js • React • TypeScript • Tailwind CSS • Playwright

1968 Clothing

Designed and developed a modern e-commerce landing page for a streetwear brand focused on responsive design, product presentation, and user experience.

HTML5 • CSS3 • JavaScript
